Loading Data

```
# the path. Something like: "C:\Users\Quintin\Documents\phd_local\02_repos\mri-dl-recon-fov-analysis\data"
# it should be ';' seperated.

# give summary of the data and types and structure.
```

Preprocessing Data

You can also embed plots, for example:

```
# based on the datatypes, see if any datatypes must be converted to factors or categoricals or numeric.
#lets also do proper rounding for the data if needed.
```

Visualization

Boxplot

```
# text
```

Violin Plot?
